

# CONSTRUCK BRIDGE PROTECTION SYSTEM

Introducing

## A Versatile Bridge Safety Barrier

Construck combines the best of technologies to create a bridge protection barrier which satisfies the performance ratings of International Standards like IWA, NCHRP, MASH

An excellent solution for sand mitigation to avoid clogging of sands in highway bridges

Replaces Concrete Barriers completely while maintaining same effectiveness and efficiency

Perfect solution for U-turns and places with zero deflection tolerance

Double Protection with Valmont H2 or TL4 systems combined to stop stray mobile elements
